e-marketing at its finest

More than a webcam: your digital marketing platform to generate traffic, new contacts and promote your brand!

plug & play

Installation is easy - and thanks to our multimedia web tools you are online immediately.

a solid investment

Proven reliability and longevity of the product combined with professional service.

The Roundshot camera is the Rolls Royce of webcams. Super nice pictures - pin sharp and 24/7, with a world-class support. We on the Gemmi were the first in the Valais to be convinced of the quality and service of the Seitz company. Since 2014, our guests have also been able to always appreciate the marvellous views at the Gemmi.

Wolfgang Loretan Gemmibahnen AG Leukerbad

For us, the Roundshot webcams are an important part of the information and communication with our guests. This is also shown by the online access statistics for the webcams, which account for a quarter of our total traffic. This is why we are constantly expanding the webcam infrastructure with Roundshot webcams.

Marc Schürmann, Ferienregion Lenzerheide

We are completely satisfied with the Roundshot webcam service. The responsiveness and exemplary technical support provided by the Seitz team are impressive. The experience provided by the Roundshot product is simply outstanding. As enthusiastic customers we warmly recommend Roundshot to anyone who wants to harness the power of 360° imagery for the promotion of tourism.

Vincent Matthey, Tourisme Neuchâtelois

The Livecam Family 2024

Our Livecams work day and night, in summer and winter, at the sea as well as on the highest mountain peaks. The Roundshot Livecam is a durable product that meets the highest demands and is a loyal companion for all your e-marketing projects. Discover the numerous application possibilities of our versatile Livecam product range.
